

We hope that you and your students are continuing with your innovation journey through AIM's #TinkerfromHome modules. AIM is glad to launch the #TinkerfromHome webinar series. A learning series where every day is full of learning new things with your fellows and your mentors.

The #TinkerfromHome webinar series is a compendium of curated content on various 21st century skills, delivered by experts and content developers from AIM partners. These sessions will foster peer-to-peer learning by allowing a limited classroom size and 2-way interaction with your teacher/facilitator. Each day of the week is dedicated to one key 21st Century Skill such as IPR, Creativity, Digital Skills, Gaming, IoT and electronics, Mobile app development, Astronomy and many more.

Till end of June 2020, AIM shall be introducing new technologies and conducting regular webinars for the innovators of our country.

This week, we are glad to share the webinar schedule, as follows:

1. Intellectual Property Rights

Facilitator - IPR sessions curated by CIPAM-DPIIT, Govt. of India's body which educates and ensures focused action related to IPR.

Day - Tuesday

Time - 4:00 pm

Link : <https://forms.gle/GMM1J5RG4Ygwaz6h7>
