

Dear Parents of the academically top 50 in our class 8s to 12s,

Thank you, if you have responded to my previous message on this subject. If you have not kindly take the time to answer the questions given - it will be of great help to the school and the Alumni body. Please send in your responses definitely on the 12th Jul morning.

While we are sure that you are doing all that is necessary to help your sons excel, the school has been wondering why our students best percentages have hovered around the 98.5% area and not moved up into the 99-100% range. Our search is "Why have students in other schools been able to achieve this ?", "what can we do ?"

In our Columban tradition we have focused beyond teaching the courses, on the weaker students and let the top of the class, for a significant part, help themselves. Thankfully, our Alumni have expressed their willingness to help the school also help your sons.

Your responses to my previous circular and your presence at the meeting on **Saturday, the 14th July at 11am in the Edmund Rice hall** will greatly help the school find answers to these questions.

Thank you,

Bro Miranda
